

## VT Colocation

If you want to operate your hardware in a highly reliable, secure facility, VTCloud Colocation is for you.

Venture's Data Center is a hardened facility that is purpose-built to house IT assets and host mission-critical applications. Our highly resilient infrastructure ensures continuous access for your users via a variety of private or Internet connectivity options.

Your IT assets are safe in our highly secure facility. Our Data Center's grounds and building are continuously patrolled. Multiple levels of authentication are required to enter the facility. The entire facility is under continuous video surveillance. Biometric identification allows only authorized access. We employ enterprise-class network security technology to protect against unauthorized access and malicious attacks.

Unlike other colocation providers, our services are customizable to fit your unique technical and business requirements.

### Benefits of VTCloud Colocation

- ✓ Operate your private hardware in a "hardened" environment
- ✓ Leverage our powerful, secure, resilient infrastructure and high-capacity connectivity
- ✓ Never worry about costly data center downtime
- ✓ Access your servers through direct connectivity or internet VPN
- ✓ Industry leading SLA
- ✓ Cisco Powered data center

**V-Pledge:** You can count on Venture Technologies to listen and understand your unique needs and to design solutions that align with your business objectives. We pledge only to make commitments that we can keep and to deliver IT solutions on-time and within budget through our highly-skilled, resourceful staff. At Venture, common sense, reason and fairness frame our relationship with everyone we serve. It all comes down to treating you the way we would like to be treated – with respect and integrity.
